

Para precauciones y uso en español llamar al 1-800-533-5025

Carefully read all directions, notes, and cautions prior to use.

Klean-Strip Rust Remover quickly cuts through and dissolves rust from metal surfaces. Perfect for wrought iron work because its thick, jellied consistency allows it to cling to vertical surfaces without dripping. Removes rust stains from many surfaces. Use on these metal surfaces to remove rust: • Tools • Boats & Automobiles • Gutters • Outdoor Furniture

DIRECTIONS FOR USE

Carefully read all cautions and directions before use. Protect hands with solvent-resistant gloves, and eyes with safety glasses. Wire brush or scrape off loose rust scale. Remove all oil and dirt from the surface using hard surface cleaner of your choice. Brush a heavy coat of Rust Remover on all rusted areas. Wait 5-10 minutes for light rust to dissolve (up to several hours for heavy rust). Scrub rusted metal after rust is dissolved, flush surface with water and allow to dry. Repeat application for stubborn rust. Repaint or apply anti-corrosion coating to cleaned surfaces to prevent re-rusting.
